

## PIRULANVUORI (Mount Devil's) TOWER

From the viewing deck at the top of this 15 metre tower, you may see three lakes: Palojärvi, Miekkajärvi and Lavijärvi. These lakes form part of a chain of lakes between Suodenniemi and Lavia.

The elevation from the surface of the lake Palojärvi to the top of the tower is 62 m. From the bottom of the lake to the top of the tower, the elevation is 103 m. The highest point of the tower is 112,5 meters above the sea level.

The scenery has been depicted by sculptor Pertti Mäkinen on the reverse of the Finnish one euro coin

This tower was built in summer 2012 by Lions Club Suodenniemi and its 24 members.

As the tower stands on a private ground, please keep the surrounding area clean and free of rubbish.

Thank you for visiting Pirulanvuori. Welcome again!

We did it!
